

FEATURES

- 53-foot trailer opens to 184 feet with bumper
- Steel treadplate fenders available on the front and rear
- Add 24" long bunks to provide additional loading areas across the main beams: rolling and adjustable non-rolling versions available
- Rear-facing worklight at front, rated at 1200 lumens
- Red/green indicator lights on the toolbox front and rear signal if the power unit is on or off
- Air and electrical lines are well-protected inside turn table plates to keep them clean

SELF-STEERING SYSTEM

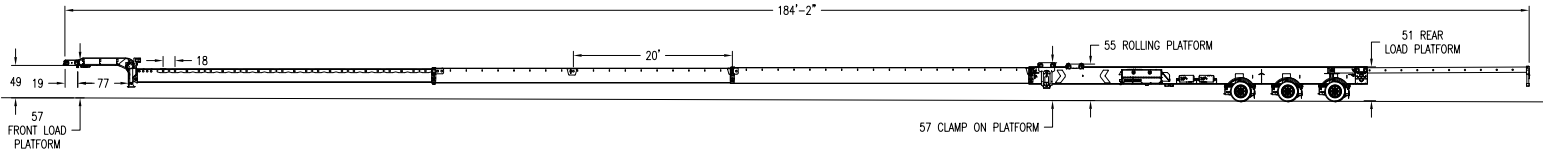

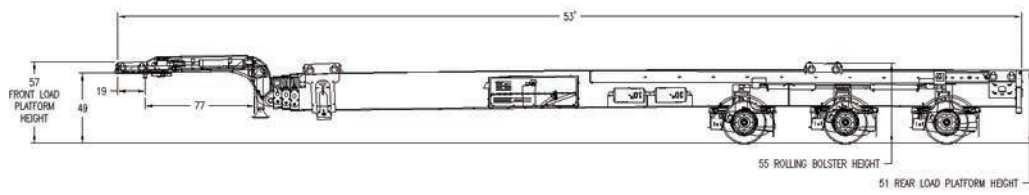

The axles automatically rotate to keep the trailer behind the truck at all times; the kingpin rotates and prompts the axles to track with it. An override remote allows drivers to take full control as needed. A beacon light alerts the driver and pilot car when the axles are turning (past 3 degrees).

CONVENIENT EXTENSION

XL's trusted extendable technology is the key to hassle-free extension; all trailer beams as well as the pullout bumper are on greasable rollers. Experience the smooth, quick, convenient extension of an XL with the Blade Mate. Extend from 53 feet to 184 feet with the pullout bumper. The XL BM is even prepped for deck inserts which allow you to reach over 200 feet in length overall.
