The axles automatically rotate to keep the trailer behind the truck at all times; the kingpin rotates and prompts the axles to track with it. An override remote allows drivers to take full control as needed.

The tail is comprised of two sections – an 8-foot 8-inch platform ramp and a 60-inch flip tail. Both hinge points stay clean thanks to lug style hinges. These hinges prevent debris from accumulating.

**UNIQUE HYDRAULIC TAIL DESIGN**

- Neck adjusts to uneven terrain without the use of blocks so you can load and unload almost anywhere
- The low incline ramp makes it easy and safe to load pavers, scrapers and other heavy equipment
- Exceptionally strong deck for a variety of loads
- Specialized designs available for your needs
- 26' main deck length
- Bucket well in rear

**XL HFG: PIPELINE SPECIAL**

The XL HFG: Pipeline Special is engineered to handle demanding off road applications. It features heavy-duty cross members, heavy-duty swing out outriggers and upper flange reinforcement down the length of the main deck.

**XL HFG: RAILROAD SPECIAL**

The XL HFG: Railroad Special offers users a solution for hauling large, heavy equipment that requires heavy-duty ramps for loading. It features a 57-inch gauge rail (submerged in gooseneck and deck) and 8-foot pin on aluminum gooseneck ramps with bolt-on steel tips.
